GEL MEMORY FOAM

- Improved Air Circulation - Memory foam is infused with gel beads which provides better airflow, better directing heat away from the body for a cooler sleeping surface and all night temperature comfort.
- Superior Comfort - Gel foam resists motion transfer and has a plush feel.
- Stable Support - It moulds to your body to provide custom support while keeping you from sinking too far into your mattress.
- Back Pain and Pressure Relief for side sleepers - Gel memory foam moulds and responds to your unique body weight and relieves pressure points along your hips and shoulders - it also keeps your spine properly aligned while you sleep to reduce morning aches and pains.
